Diversification of renewable energy resources
Dynamism of rural areas
Economic cost of HIV and AIDS, Malaria and TB
Economics and Business of Sustainable Human and Social Development
Education and Information Technologies
Education of Sustainable Human and Social Development
Education required for Skills, Technologies and Innovation needed for economic growth and poverty eradication
Empowering People for Participation in Society
Energy, Environment, Sustainable Development
Enhancing understanding the performance of governmental and non-governmental organizations
Environment of Sustainable Human and Social Development
Environmental and Social impact assessment of rural development programs
Environmental studies
Ethical Principles for Design, Research & Construction in the Human Environment
Ethnic Studies/International Studies
Food and agricultural policies in the context of trade liberalization
Food insecurity and collective security

Food insecurity and global fight against poverty
Food Security and energy crisis
Food security and sustainable agriculture: State of science and technology
Food security indicators
Food Security, Human Rights and Justice
Food security, quality and sovereignty
Funding of national and international programs for sustainable rural development and food security
Gender and Development for poverty eradication
Gender dimensions of agricultural and rural employment
Gender Studies
Global governance of food security
Globalization of Sustainable Human and Social Development
Human & Social Rights in the Context of Sustainable Development
Human and Social Evolutionary Complexity
Human Development based on psychological and social concepts
Human resources for sustainable rural development
Human Rights Development
Human-Environment Interactions
Identifying Best Practices for Synthesizing Findings of Assessments on Climate Change Energy Crisis and Food Security for Use in Formulating and Implementing Policies
Impact of climate change and energy shortage on agricultural development
Improvement of integration between agricultural, industrial and service sectors
Improvement of Living & Working Conditions
Improving the quality of life among groups in diverse multi-ethnic societies
Infrastructure support for regional integration, poverty eradication and development
Innovation, Technology and Society
Integration into agriculture of non-agricultural activities
Interdisciplinary Research and Studies
International Relations & Collaborations
Investigating social science approaches for participatory decision-making (since decisions are made at all geospatial levels [that is, global, regional, national, state and provincial, local, and individual]).
Key requirements of food security and sustainability
Land Systems and Sustainable Agriculture
Law and Justice
Main Areas of Rural Development Policies
Mathematical Modeling in Social Science
Measuring the performance of management actions through expected and measurable outcomes for Sustainable Agriculture and Rural Development.
Open Learning and Distance Education
Opening Up Various Spheres of Society
Organizational Decision Making
Political Science and Decision Making
Politics, society, and international relations
Preservation and Green Urbanism
Preservation of land resources
Preservation of rural expertise and know-how
Preventing crime and reducing conflict
Prevention of forced economic and ecological migration
Privacy Personal Data Protection
Promotion of Sustainable Rural Development
Promotion of sustainable tourism
Promotion of World Food Security
Public Governance
Public Participation in Decision-Making Matters
Public-public and public-private partnership for global food security
Recovery from conflicts and disasters

Regional Economic Integration
 Regulated Agent-Based Social Systems: Theories and Applications
 Regulatory framework governing international policies and trade in agricultural products
 Removing Physical Restrictions on Participation
 Required Infrastructure to develop agricultural production/trade and food security
 Research and technology in sustainable agriculture
 Responsible Consumption
 Rural Development and Sustainable Management of Natural Resources
 Rural Development,
 Social and Organizational Complexity
 Social Aspects of Sustainable Development
 Social Complexity
 Social Justice, Solidarity & Inclusion
 Social Network Analysis
 Social Systems Dynamics
 Societies and Technologies
 Sociology and Social Computation
 Socio-spatial integration
 Socio-spatial Integration.
 South-South and North-South partnership
 State of food security and sustainable development across the world
 Statistics of Sustainable Human and Social Development
 Strengthening the role of Agriculture in Poverty Eradication
 Sustainable agricultural development as a strategic choice for food security
